1. Framework for Practice: Risk Estimation Pre- Birth Risk Assessment Tool

Framework taken from an adaptation by Martin Calder in 'Unborn Children: A Framework for Assessment and Intervention' of R. Corner's 'Pre-birth Risk Assessment: Developing a Model of Practice'.

Factor	Elevated Risk	Lowered Risk
The abusing parent	 Negative childhood experiences, inc. abuse in childhood; denial of past abuse. Violence abuse of others. Abuse and/or neglect of previous child Parental separation from previous children No clear explanation No full understanding of abuse situation No acceptance of responsibility for the abuse Antenatal/post natal neglect Age: very young/immature Mental disorders or illness Learning difficulties Non-compliance Lack of interest or concern for the child 	 Positive childhood Recognition and change in previous violent pattern Acknowledges seriousness and responsibility without deflection of blame onto others Full understanding and clear explanation of the circumstances in which the abuse occurred Maturity Willingness and demonstrated capacity and ability for change Presence of another safe non-abusing parent Compliance with professionals Abuse of previous child accepted and addressed in treatment (past/present) Expresses concern and interest about the effects of the abuse on the child
Non-abusing parent	 No acceptance of responsibility for the abuse by their partner Blaming others or the child 	 Accepts the risk posed by their partner and expresses a willingness to protect Accepts the seriousness of the risk and the consequences of failing to protect Willingness to resolve problems and concerns

Family issues (marital partnership and the wider family)	 Relationship disharmony/instability Poor impulse control Mental health problems Violent or deviant network, involving kin, friends and associates (including drugs, paedophile or criminal networks) Lack of support for primary carer /unsupportive of each other Not working together. No commitment to equality in parenting Isolated environment Ostracised by the community No relative or friends available Family violence (e.g. Spouse) Frequent relationship breakdown/multiple relationships Drug or alcohol abuse 	 Supportive spouse/partner Supportive of each other Stable, or violent Protective and supportive extended family Optimistic outlook by family and friends Equality in relationship Commitment to equality in parenting
Expected child	 Special or expected needs Perceived as different Stressful gender issues 	Easy babyAcceptance of difference
Parent-baby relationships	 Unrealistic expectations Concerning perception of baby's needs Inability to prioritise baby's needs above own Foetal abuse or neglect, including alcohol or drug abuse No ante-natal care Concealed pregnancy Unwanted pregnancy identified disability (non-acceptance) Unattached to foetus Gender issues which cause stress Differences between parents towards unborn child Rigid views of parenting 	 Realistic expectations Perception of unborn child normal Appropriate preparation Understanding or awareness of baby's needs Unborn baby's needs prioritised Co-operation with antenatal care Sought early medical care Appropriate and regular ante-natal care Accepted/planned pregnancy Attachment to unborn foetus Treatment of addiction. Acceptance of difference-gender/disability Parents agree about parenting

Social	 Poverty Inadequate housing No support network Delinquent area 	
Future plans	 Unrealistic plans No plans Exhibit inappropriate parenting plans Uncertainty or resistance to change No recognition of changes needed in lifestyle No recognition of a problem or a need to change Refuse to co-operate Disinterested and resistant Only one parent co-operating 	 Realistic plans Exhibit appropriate parenting expectations and plans Appropriate expectation of change Willingness and ability to work in partnership Willingness to resolve problems and concerns Parents co-operating equally
