

Environmental Policy 2025

The Caldecott Foundation

The Caldecott Foundation is committed to delivering high-quality care and education while reducing our environmental impact. As a UK-based charity supporting vulnerable children and young people, we have a responsibility to contribute to a more sustainable and climate-resilient future.

Our Environmental Commitments

We are aligned with the UK Government's Net Zero 2050 targets and commit to:

- Continually improving our environmental performance
 - Reducing our carbon footprint across all operations
 - Using resources efficiently and minimising waste
 - Preventing pollution through safe and proactive practices
 - Ensuring buildings and grounds are maintained sustainably
 - Considering environmental impact in all procurement decisions
 - Complying with all relevant UK environmental legislation and standards
-

How We Will Deliver This

We will:

- Assign responsibility for environmental management to leadership
 - Set and review measurable annual targets
 - Monitor and report our carbon emissions and energy usage
 - Engage staff, carers, and young people in sustainability efforts
 - Provide relevant environmental training and guidance
 - Factor climate resilience into service and infrastructure planning
 - Encourage biodiversity and green space enhancement at our sites
-

Governance and Review

This policy is overseen by the Health & Safety Lead, supported by the Executive Team and Board of Trustees. It will be reviewed annually, or sooner if legislative changes or operational needs require.

Our Values in Action

Environmental responsibility is integral to our mission. By embedding sustainable practices into our daily work, we strengthen our care, education, and support for future generations.
