## Child Protection for Dental Professionals

## Safeguarding Children is everyone's business

As a member of the 'Children's Workforce' Dental Professionals and your support staff have a responsibility to ensure safeguarding children (child protection) is an integral part of your daily work.

## You all have a responsibility to ensure that:

- You and those staff who have direct contact with children are able to recognize a child welfare concern in children; for example
  - o Are you concerned about how an injury may have been caused?
  - o Are you concerned about an explanation given for any injury?
  - o Does the explanation for an injury change over time?
  - o Are there injuries that can not be explained?
  - o Has there been a delay in presentation to your service?
  - o Is there a pattern of 'Was Not Bought' to appointments?
  - o Is there a history of recurring injury that may suggest a child welfare concern?
  - Are you concerned about a child's interaction with his or her parent/carer?
  - Are you concerned about the parent/carer's interaction with you or the child (a refusal to allow you to speak to the child for instance)?
- 2. You know what to do with concerns and who to pass them on to when they arise
- **3.** You know how to access support and advice about how to deal with child welfare concerns
- 4. You receive training in safeguarding at an appropriate level
- **5.** You are able to ensure you and your staff practice safe recruitment and respond appropriately to concerns raised about staff within your practice
- **6.** You have a safeguarding policy easily accessible to staff and patients

## For help and advice contact

- 1. For further safeguarding help or advice
- 2. Multi-Agency Safeguarding Hub (MASH) to make a referral
- 3. or if you just want to discuss any safeguarding concerns
