## The Health Umbrella

"Think Health"

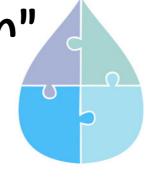

Each health professional/organisation may hold, or need, a vital "piece of the jigsaw". Therefore always think about requesting & sharing relevant information in order to aid decision-making in safeguarding children.

Routinely consider which health professionals from which services need to be invited to attend meetings and/or to provide information by a written report or answers to specific questions.

If GP registration details are not known, email pcse.informationservices@nhs.net (Each request for information must clearly state who the requester is (eg the organisation or body which they work for), the relationship between themselves and the person whose information is being requested and the reason for why the information is being requested).

## Think GP!

- Always invite the child's GP to child protection conferences.
- Always send meeting minutes and decision outcomes directly to the GP practice so that they are made aware of the multi-agency decisions and recommendations.
- Liaise in person with the GP or practice manager if further information is required or needs to be shared following a meeting.
- Nominate a specific individual at the meeting to action this, particularly if there are actions relating to the child / family that need to be brought to the attention of the GP.

## What this will achieve?

- Better communication & two-way sharing of information -> improved decision making
- Building of relationships between different professionals
- Increased understanding of roles & responsibilities
- Clearer, enhanced knowledge of family/child/issues
- Greater awareness of risks/concerns
- More shared understanding about potential vulnerabilities
- Appropriate action/follow-up being taken
- Better partnership working to improve outcomes.
